## Art Workshops

### Alcohol Ink Planter Workshop

*Dana Haigh*

Create a stunning, one-of-a-kind ceramic planter using the vibrant, fluid beauty of alcohol inks! In this class, you'll explore rich color blends and organic movement as the inks flow across the surface to create a dynamic, abstract design. Come ready to experiment, embrace the unexpected, and watch your colors come to life in exciting new ways.

*Wednesday | Apr 8 | 6:00-8:00 PM | Prescott | \$40*

*Material fee \$25 | Age 15+*

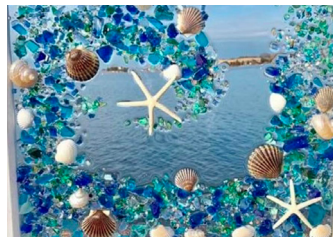

### Cyanotype Printing

*Dana Haigh*

Explore cyanotype printing on paper or fabric to create botanical or photo-style prints by applying a light-sensitive iron solution, then exposing it to sunlight to produce a cyan-blue print. Cyanotype is a photographic printing process invented by Sir John Herschel in 1842. It was first used to make architecture blueprints. This technique can now be used on paper or fabric to produce a permanent, washable, Prussian blue design. Come ready to play, experiment, and be amazed.

*Wednesday | May 6 | 6:00-8:00 PM | Prescott | \$40*

*Material fee \$20 | Age 15+*

### Epoxy Resin Art Workshop

*Mary A Barbarow*

Grab a friend and join us for a fun, creative night making your own epoxy resin charcuterie board or picture frame! In this hands-on workshop, you'll be guided step-by-step as you design your piece using beautiful materials like shells, sand, and sea glass. Then watch it all come together as you pour the resin and bring your design to life. No experience needed—just come ready to relax, get creative, and have fun. You're also welcome to bring your own special items to personalize your piece.

*Saturday | Jun 6 | 2:00-4:00 PM | Prescott | \$30*

*Material fee \$30 | Age 15+*

### Basket Weaving: Bean Pot Basket

*Debra Rolfe & Ann Carpenter*

Learn the basics of weaving by making a classic and versatile Bean Pot Basket! Originally used for shelling beans, this traditional basket has become ideal as a planter, storage container, stylish gift, and home decor piece. Handwoven for durability and charm, it is both useful and gift-ready. Invite a friend and enjoy a fun, creative day of weaving together! Basket measurements: diameter 9", height 7".

*Saturday | May 30 | 9:00 AM-4:00 PM | Prescott | \$110*

*Material fee \$25 | Age 15+*

## Plein Air Painting: Groton & Surrounding Towns

### Tai Chi for Health

*Pat Parker-Roach*

Chi (Qi) has been used for thousands of years to support physical, mental, and spiritual health, and its benefits are now recognized in Western health practices. This course makes these benefits accessible to all, welcoming both beginners and experienced practitioners. Evenings begin with Qigong warmups, followed by Cheng Man-ch'ing's short form of Yang-style Tai Chi, then wind down with Tai Chi for Liberation and quieting Qigong. Each week includes instruction or review of each form, helping new students learn quickly and giving experienced practitioners a chance to refine their skills.

## SCIENCE & TECHNOLOGY

### **Interactive AI Workshop: Smart Use of AI at Home & Work**

*Beth Zukowsky*

AI tools are becoming part of everyday life—from writing emails and planning trips to helping kids with homework. The question is not whether to use them, but how to use them well. In this practical and accessible seminar, former CTO Beth Zukowsky shares simple, effective ways to use AI tools to save time, support learning, and make better decisions while staying thoughtful and intentional. You'll explore what AI can realistically help with today, how to ask better questions for more useful results, where human judgment matters most, and a simple framework for deciding when AI adds value. No technical background is required. You'll leave with practical skills you can apply right away, along with a clearer understanding of how AI can support your goals—without replacing your thinking.

*Tuesday | May 14 | 7:00-9:00 PM | Prescott | \$20 | Age 15+*

### **Computer Technology Help for Seniors**

*Rachel Makosky*

This monthly program helps you get more out of your laptop, tablet, or phone. Each session begins with a helpful feature, followed by open time to work through real questions—so everyone learns together. Bring your challenges and leave with solutions!

### **Interactive AI Workshop: Creative AI Tools**

*Beth Zukowsky*

AI is more than just a productivity tool; it is a powerful resource for creativity, exploration, and play. In this hands-on workshop, participants will explore the artistic side of AI by using it to generate images, music, stories, and fresh ideas for personal projects. Through a blend of live demonstrations and guided experimentation, you will learn how AI can support creative brainstorming and where your own human voice remains most essential. Explore these tools in a relaxed, hands-on session—and learn how to make them part of your creative practice.

*Tuesday | May 26 | 7:00-9:00 PM | Prescott | \$20 | Age 15+*

### **Interactive AI Workshop: Practical AI for Everyday Tasks**

*Beth Zukowsky*

Once you know the basics, the next step is learning how to use AI in ways that are helpful in daily life. In this workshop, we'll explore simple, effective ways to use AI for common tasks at home and at work—from writing and planning to learning, organizing, and researching. The focus is on using AI more effectively, with real-world examples and techniques you can start applying right away. You'll learn how to get better results from everyday AI tools, use AI to learn new topics and summarize information, and understand where AI can save time—and where your own judgment still matters most. This session is ideal for adults who want to move beyond the basics.

### **Yikes! AI Just Took My Job—What Now? And Other Questions We Should Be Asking**

*Pat Parker-Roach*

Pat will lead a discussion on how AI will impact our lives, jobs, community, country, and the world. It took a century for the industrial revolution to unfold and decades for the internet to change our lives. With AI doubling in power every 7 months, are we ready for the implications? How will humanity eventually respond to AI changes, and how will we value ourselves and each other? Will these AI changes be disruptive to our well-being and to both local and global stability?

*Tuesday | Apr 28 | 7:00-9:00 PM | Prescott | \$20 | Age 18+*

### **Geopolitical Roundtable: A Closer Look at Significant Issues and Events in Geopolitics Today**

*Bruce Zukauskas*

MG(Ret) Zukauskas will lead and facilitate a roundtable discussion on significant geopolitical issues and events occurring in today's complex world in order to provide a forum for a better understanding of world events and a means to discuss and learn about different viewpoints on world affairs. General Zukauskas will select his "Top 3 Issues/Events of the Day" prior to each session and will provide 20 mins of background information to help attendees better understand the topics. A roundtable discussion will immediately follow.

# KIDS SUMMER FUN!

## Interactive AI Workshop: Creative AI Adventures - Ages 5-9

*Beth Zukowsky*

In this fun, hands-on program, children will explore age-appropriate AI tools for creating pictures, music, characters, and story ideas. Each day, students will complete two guided creative projects, using their imagination and simple AI tools as a starting point. The focus is on creativity, play, and exploration—encouraging children to use AI to spark ideas and then build on them through art, storytelling, and music activities. Projects may include creating colorful AI-generated images and turning them into posters or story illustrations, making simple songs or soundtracks, designing characters, and writing short stories with AI support. Along the way, children will also learn basic concepts about how AI works and how to use it responsibly. The goal of this program is to introduce AI as a creative tool while strengthening imagination, curiosity, and critical thinking skills.

## Creative Art Cafe: Create Edible-Inspired Masterpieces - Ages 6-9

*Vanessa Holm*

In this creative art workshop, young artists will become “chefs” of imagination. Each session begins with the instructor reading a story to inspire creativity, then children craft food-themed artwork—think pizzas, layered cakes, doughnuts, and more—using paints, collage materials, glitter, and glue. Over two days, students can explore different stories and projects, creating colorful masterpieces to display or enjoy in imaginative play at home.

## Kidpreneurs: Build Your Own Lemonade Stand - Ages 6-9

*Tara McNamara*

In this hands-on summer program, kids become real “Kidpreneurs” as they build and run their very own lemonade stand from start to finish. They’ll dream up fun flavors, test their recipes, design signs, set prices, and work together to bring their business to life.

Along the way, they’ll talk to real customers, gather feedback, and make decisions just like true entrepreneurs—then set up shop outside Prescott Community Center to sell their final product to the community.

Friends, family, and neighbors are invited to stop by, support these young business owners, and enjoy a refreshing cup of lemonade! All proceeds will go toward supporting future community programs at Prescott.

It’s a fun, creative, and confidence-building experience where kids learn teamwork, problem-solving, and the excitement of running their own business.

## **Interactive AI Workshop: Creative AI Studio - Ages 10-14**

*Beth Zukowsky*

In this interactive program, students will explore how AI can support creativity in art, music, storytelling, and idea generation. Each day, they will complete two hands-on projects that combine AI tools with their own thinking, choices, and creative direction. The focus is not only on creating with AI, but also on learning how to shape stronger prompts, compare results, revise ideas, and think critically about what makes a project successful. Activities may include creating and refining AI-generated artwork into posters or story illustrations, making original songs or soundtracks, designing characters and imaginative worlds, and developing short stories with AI support. Students will also learn foundational concepts about how AI works, where it is most useful, and why human creativity and judgment still matter. The goal of the program is to help students use AI as a creative resource while building imagination, confidence, and thoughtful decision-making skills.

## Fiction Writing Workshop: No Plot? No Problem! - Ages 12-18

Elaine Isaak

No plot? No problem! Take your story to the next level in this fun fiction writing workshop! Each day we'll start with some warm-up writing exercises, then dive into one of the elements of fiction to see how character, conflict and setting work together to create a plot. Then we'll brainstorm ways to escalate the tension to build a great story. Using a combination of lecture, group and individual exercises, this workshop will allow teens to explore the craft of fiction to develop their unique ideas in any fiction genre.

## Alcohol Ink Painting: Beginners - Ages 12-18

Dana Haigh

In this workshop, Dana Haigh will introduce the Alcohol Inks medium to create paintings of free flow of expressions. Alcohol inks are fast-drying and highly pigmented. They flow freely over any non-porous surface and have a mind on their own, allowing for a liberating approach to art and unexpected, spontaneous results. If you are open to just having fun and "going with the flow", this is the medium for you to explore.

## Dungeons & Dragons Adventures! - Grades 5-12

Kevin Keaney

Gather your party of heroes and prepare for a summer of fun and adventure! This summer enrichment program is centered on Dungeons & Dragons (D&D), the world's most popular tabletop role-playing game and a member of the National Toy Hall of Fame. D&D is a collaborative storytelling game set in a fantasy world where players face challenging puzzles, mysteries, and dangerous monsters—all while creating an original, unfolding heroic tale! Players develop original characters who learn and grow from their choices, becoming heroes by overcoming challenges together. This program uses D&D as an educational tool to develop critical thinking, creative writing, teamwork, leadership, mathematical skills, and social-emotional learning in a structured, inclusive classroom environment.
